China	CHN

STUDY TYPE
Other Household Survey [hh/oth]

ABSTRACT
The Refugee children's education survey collects data on children attending school as well as their school experience. The survey creates a roster of children who are currently attending school, as well as information about children who are not yet enrolled but wish to be in local public schools for the upcoming academic year. The information of children who wish to enroll will be shared with the relevant authorities for school enrollment.

The purpose of of the second module of the survey is to understand school children's self-evaluation (as well as parents' evaluation) of their school performance and experience. The survey is specifically designed to assess the interventions taken by schools and parents for children who have experienced bullying or require additional support in their studies. The results will inform UNHCR's follow-up actions and interventions.

For the school year 2024-2025, information on 48 children of school age were surveyed in April and May of 2024.
